AMENDMENTS TO THE ABSTRACT

On page 9, please amend the Abstract as follows:

The invention herein is an enhanced VAD device (EVAD), for a physician to use to restore a dysfunctional native heart with severe muscular damages to good health, so that the EVAD can be explanted eventually. The EVAD device comprises one or two VAD(s) a pacemaker ~~controlled means~~ for sending electrical pulses to the native heart, a first monitor ~~graphical means~~ for monitoring the patient's response to each of said electrical pulses from the pacemaker, ~~controlled means~~ a set of attachments for measuring biological and or clinical signals at various organs both inside and outside the patient's body, and a controller ~~electronic means~~ for facilitating the physician's work.
